### All Fired Up

Aqua Creations has launched an extension to the Mimosa Collection. Inspired by the fibrous shape of neurons, the new lighting range consists of a floor lamp with concrete base, a 1m pendant version, and a lighter, flat pendant lamp. The shades are made from a laser-cut, galvanised metal structure sprayed with clear polymer, resulting in a white membrane that distributes the light perfectly. Each piece is sculpted by hand, allowing variations to occur in shade to shade.

### Forest Feel

New Delhi-based design studio Knock On Wood has fashioned a special line of custom wood furniture. A highlight of the collection is the 6ft-long coffee table-cum-bench, which is carved out of a single log of wood. Its pointed tip and the burn stains on the surface give it a natural, rustic finish. Niches have been strategically carved into the log to create space for displaying small items. The king-sized bed combines natural teak wood, a rusted steel frame and natural linen fabric. Along with the solid oak bedside tables, the ensemble adds a stylish touch to any bedroom. [www.knockonwood.in](http://www.knockonwood.in)
