

OUT OF THE CLOSET

Old Mother Hubbard will be very proud of this cupboard. Titled PA Home Office, designed by furniture studio, Knock on Wood, when shut it looks like a closet, however, when open, it turns into a home office. Though its compact in suze, it comes with ample storage. The pull-out work top slides out to reveal a place to stash stationery while the shutters have provision for holding essentials such as pens and pencils. It even has space to place a fax machine, copier or printer. That's not all, a knob on one side of the cupboard holds a flat piece of wood that opens up to form a chair.
